
BIMCV-COVID19+ (COVID-19) and BIMCV-COVID19− (non-COVID) public releases
Patients with ≥1 retrievable chest CT volume and ≥1 retrievable chest radiograph (no date window)
Excluded: CT or radiograph missing or not retrievable
One radiograph and one CT volume per patient (largest CT file; first radiograph by path)
Patient-level label from the release; seeded random fold assignment within each class
Final cohort: 510 patients (113 COVID-19 / 397 non-COVID); per fold: test k, validation (k+1) mod 5, training on the remaining three folds
